Barracuda Email Security Gateway Vx

Complete Protection from Email-Borne Threats

Virtual solutions are ideal for IT professionals who are looking for consolidation and cost savings. The Barracuda Email Security Gateway Vx is a **comprehensive email security solution that blocks email-borne attacks,** while also providing the extra features needed to ensure business continuity.

- □ Storage
- □ Application Delivery

The Barracuda Advantage

- Free Cloud Protection Layer providing:
 - Email spooling up to 96 hours
 - Inbound email filtering
- Barracuda Real-Time Protection
- · Outbound email filtering for DLP
- Cloud-based encryption included free of charge
- · Configuration backup to the cloud
- Preconfigured for quick deployment
- No per-user or per-server fees

Product Spotlight

- Industry-leading spam and virus defense for email
- Protection from data loss and reputation damage
- Advanced Threat Detection* to protect against ransomware and other advanced threats
- Long-lasting product that stays ahead of the latest threats
- · Advanced, granular policy management

Comprehensive Protection for the Long Term

The Barracuda Email Security Gateway
Vx includes spam and virus blocking,
data protection, email continuity, DoS
prevention, encryption, and policy
management—combined to deliver a
complete solution. As new requirements
emerge, it is automatically updated with new
capabilities to ensure continuous protection.

Complete Email Threat Protection

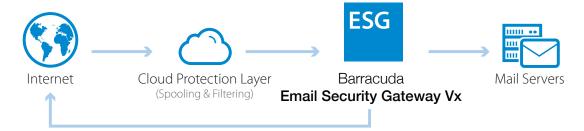

The Barracuda Email Security Gateway provides multi-layer security, email continuity, and data leakage prevention. Advanced Threat Detection* combines behavioral, heuristic, and sandboxing technologies to protect against zerohour, targeted attacks and ransomware.

Affordable and Easy to Use

Fast, easy set-up and simple, intuitive management keep time and resource needs low. The integration of the Barracuda Cloud Protection Layer and no per-user fees make it easy and very affordable to scale capacity as your business grows.

Barracuda Cloud Protection Layer filters and spools inbound email traffic.

Technical Specs

Omprehensive Protection

- SPF and DomainKeys
- · Emailreg.org
- Invalid bounce suppression

†!! Advanced Policy Control

- IP and content-based filtering
- Bulk email categorisation
- Content encryption
- · Sender/recipient filtering
- RBL and DNSBL support
- Keyword blocking
- Character-set blocking
- · Reverse DNS blocking
- URL pattern and category blocking
- TLS encryption policy
- Secondary authentication

Spam Filter

- Rate control
- IP reputation analysis
- · Fingerprint and image analysis
- Rules-based scoring algorithms

Virus Filter

- Triple-layer virus blocking
- Integrated Exchange AV Agent
- Decompression of archives
- File type blocking
- Barracuda Antivirus
 Supercomputing Grid
- Advanced Threat Detection* to protect against ransomware, zero hour and targeted attacks.

System Features

Administrators

- · Web-based interface
- User account administration
- Reports, graphs, and statistics
- LDAP interface
- · Multiple domain support
- Secure remote administration
- Delegated domain administration
- Delegated help desk role
- · Email spooling
- · Configure backup to cloud

End Users

- · User-based filtering
- · Individual spam scoring
- · Personal allow and block lists
- End-user quarantine and digest emails
- Outlook
- Bayesian analysis

Deployment Options

▼ Virtual Appliance

- · Hardened OS
- Seven models to choose from
- Common Hypervisor Support including VMware, Microsoft Hyper-V, KVM, and XenServer

Support Options

Barracuda Energize Updates

- Standard technical support
- Hourly spam definition updates
- Barracuda Reputation Databases
- Fingerprint and intent analysis definitions
- · Hourly virus definition updates
