

Fastvue Reporter

Get unprecedented visibility into internet usage and network security, built for the world's leading firewalls.

For Education

Monitor your school's internet usage for students accessing self-harm, extremist or inappropriate online content.

For Business & Government

Detect insider threats and increase workplace productivity with automated, management-friendly internet usage monitoring, reports, and alerts.

For IT Teams

Reduce troubleshooting time and get superior insights into bandwidth, security, and firewall policy issues.

Get the visibility you've been missing

Fastvue's reports and alerts highlight everything businesses, schools, and IT teams need to know about their network and internet use.

Clear, comprehensive reports

Everything you need to know about user activity, security issues and network use easily scheduled each day, week or month.

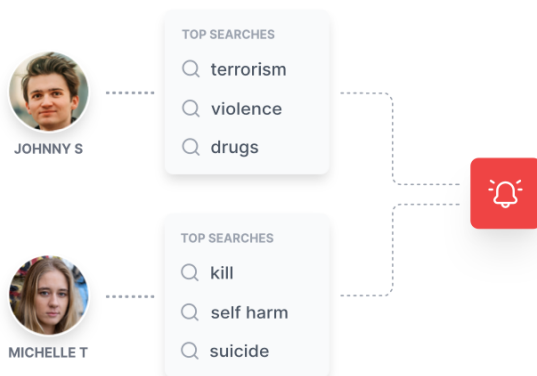

Site Clean

Fastvue's unique Site Clean technology lets you see exactly what websites are being browsed, without advertising, ugly content delivery networks, or other unnecessary noise cluttering the reports.

SITE DOMAIN	TOTAL SIZE	ORIGIN DOMAIN	TOTAL SIZE
fbcdn.net	1,010.8 MB	facebook.com	1,023.8 MB
akamaized.net	942.7 MB	office.com	909.7 MB
muscdn.com	359.9 MB	tiktok.com	365.4 MB
brain.fm	227.2 MB	apple.com	292.3 MB
scdn.co	219.2 MB	spotify.com	242.1 MB
mzstatic.com	194.3 MB	brain.fm	227.8 MB

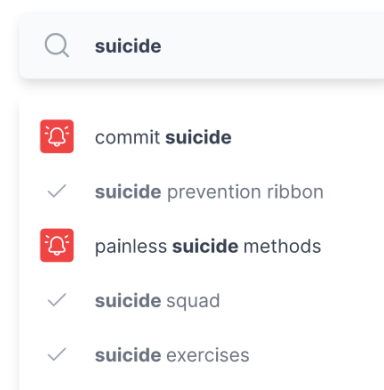

Critical, real-time alerts

Instantly detect users searching for self-harm, inappropriate, or extremist topics; large downloads or uploads, network threats, and more, and notify the people that need to know.

Keywords

Fastvue's extensive, customizable, and continuously updated keyword database flags suspicious activity related to suicide and self-harm, extremism and radicalization, racism, drugs, pornography, and profanity, without the false positives.

Productivity

Productive vs. unproductive. Acceptable vs. unacceptable. Create tailored guidelines that assess your users' browsing, so you can discover risky online behavior, identify lost productivity, or reward good digital citizenship.

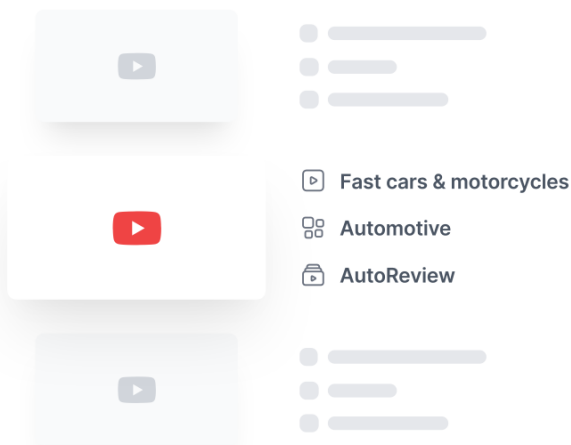

Dashboards

See what's happening on your network right now. Real-time dashboards focus on the trifecta of network concerns: bandwidth, productivity, and security.

YouTube monitoring

Clever keyword matching on YouTube titles lets you easily discover videos that may be inappropriate in your organization. See who spent time watching them, and how long.

Report on user groups

Easily segment and schedule reports for any user group. Department heads can receive web usage reports for their own department, highlighting suspicious searches, unacceptable websites and YouTube videos watched.

Designed for the world's leading firewalls

Fastvue's easy-to-read reports and alerts are purpose-built for the world's most advanced firewalls.

Trusted by thousands of organisations

Thousands of businesses, schools and government organizations around the globe use Fastvue Reporter to monitor internet usage, safeguard students and protect their network.

"We use Fastvue Reporter for reporting company-specific information to our clients (we are an MSP) in a scheduled and controllable manner so that they can better monitor staff usage. The ability to segregate information on a per-company basis is very simple and easy to configure."

Steve Griffiths
Senior Infrastructure Engineer
Strategic Group

"Fastvue Reporter is able to intelligently interpret the firewall's log files and extract detailed user activity on the web, during any particular timeframe. This produces clear reports that can be sent to safeguarding officers in real-time or on a schedule."

Paul Wilmore
Director of Technical services
Stonyhurst College

Get started in 3 easy steps

Install Fastvue Reporter

Install the free trial on a server in your network or private cloud*

Connect your firewall

Send syslog log data from your firewall to the Fastvue server.

Enjoy better visibility

Get a comprehensive view of your internet and network usage.

*Available from fastvue.co as Windows Server software or as a Linux Docker image.

We're a proud partner of the Internet Watch Foundation

Fastvue is proud to partner with the IWF to detect web searches and other online activity involving child exploitation within organizations, notifying the right people if and when they occur.
