TechnoRiver 
Outstanding Printing Software

What is SmartCodeComponent?

SmartCodeComponent allows you to easily add professional quality bar codes to Office products like Word/Excel and other third party publishing tools. It is extremely powerful, utilizing the same engine as SmartCodeStudio, the industry leading and awards-winning label design / barcode software.

How do I make use of SmartCodeComponent?

SmartCodeComponent will work flawlessly with any Windows application that supports OLE (Object Linking and Embedding) Server. This includes most Microsoft Office products, WordPad, publishing tools and many third-party softwares.

Simply insert SmartCodeComponent into your application and select a few bar code properties, such as bar code height, bar width, barcode type and bar code orientation. Your desired bar codes will be generated automatically.

Professional Quality Barcodes

SmartCodeComponent supports nearly all the industries widely used 1D barcodes. Accuracy and quality are the two key aspects of the bar code engine of SmartCodeComponent that produces the most recognizable barcodes in the industry.

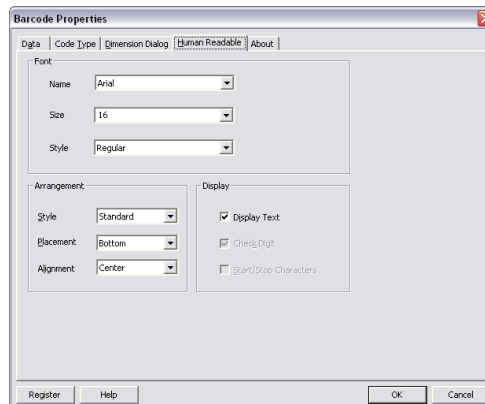

Live Demo!

The barcodes in the table below is generated by SmartCodeComponent. In the actual Word document, you can double click on the barcodes to bring up the properties dialog to change the barcode dimensions.

Innovative and Intuitive User Interfaces

SmartCodeComponent exposes a full range of barcode properties and allows precise control over barcode dimensions. The check-digit, font, barcode ratio, barcode data, symbology, extensions, Bearers bar, quiet zone and other barcode dimensions can all be specified easily through the properties dialog.

Data Verification

Data verification and validation is also carried out over all input to ensure the generated barcode meet industry specifications.

Simplicity!

We have always been committed to creating software with a touch of simplicity. We take extra considerations for every new feature added to make sure it is easy to use for our users.

Specifications

- Drag and drop functionality
- **Awards-winning barcode engine from SmartCodeStudio**
- Innovative and extremely intuitive user interfaces
- Support all common industry barcodes
- Flexible sizing options - the X dimension, wide to narrow ratio, barcode height and several other properties may be adjusted for the intended application and scanning equipment
- Complete UCC/EAN 128 Support - Support for all industry Application Identifiers
- Checksum options - checksum characters can be enabled or disabled in the barcode. In the human readable text, checksum characters can be appended to the text
- Text alignment, distance, color and font support
- Bearers Bar - Rectangle/Top Bottom bars with Quiet Zone and Bar Thickness support.
- Extended Style Display
- Standard Foreground/Background Color Editor
- UPC Extensions - Automatic Extension 2 and Extension 5 support
- **Automatic Data Validation** - To ensure the data encoded adheres to industry specifications
- High Resolution Printing
- Automatic Sizing

Barcodes Supported

- CODE128 (Auto)
- CODE128 A
- CODE128 B
- CODE 128 C
- CODE39
- CODE39 FULL ASCII
- CODE93
- EAN13 (with extension support)
- EAN8 (with extension support)
- I2OF5
- ISBN (with extension support)
- ISSN (with extension support)
- MSI
- POSTNET
- RATIONAL CODABAR\
- RSS14
- RSS14 Limited
- RSS14 Stacked
- S2OF5
- UCCEAN128 (Full AI Wizard support)
- UPCA (with extension support)
- UPCE (with extension support)
- UPC Extension 2
- UPC Extension 5

Pricing

SmartCodeComponent is available under the following type of licenses.

Single License – USD\$149.99

Single License (or Workstation license) for installation and using the software on exactly one computer. The use over a network (LAN/WAN) for several users including http-based applications is explicitly excluded.

Site License – USD\$349.99

Site License (or Unlimited Workstation license) for installation and using the software on several (or all) computers within the site of the company.

Free Technical Support, Free upgrades for a year
