

**Recommended for small businesses to mid-size enterprises with up to 1,000 users**

WatchGuard® **Extensible Content Security (XCS)** appliances defend business networks against spam and email-borne threats. Powerful, yet easy to manage, these appliances combine multiple email protection capabilities in one platform for solid email security.

#### Why buy an XCS solution?

With an XCS email security solution your business has:

- defense in-depth from email that contains threats to your network
- comprehensive protection from spam
- total visibility into all inbound email traffic
- tools and information needed to demonstrate regulatory compliance
- a cost-effective way to stop unwanted email at the network perimeter for optimal bandwidth utilization

**“We have experienced huge cost savings in addition to a significantly higher security standard.”**

Earth-friendly technology

## WatchGuard XCS™ 170, 370, 570

**Take the heat off your email servers by blocking spam and email-borne threats**

XCS appliances ensure that only safe email traffic enters your network. It's the ideal solution for any business that's looking for rock solid anti-spam and email threat protection at an affordable price.

#### IN-DEPTH PROTECTION

- **Blocks over 98% of unwanted email** at the perimeter with 99.9% accuracy, using industry-leading WatchGuard ReputationAuthority™ technology.
- **Examines sender information and content**, including images, attachments, and embedded URLs. It automatically conducts contextual analysis of message traffic for a categorized and weighted score, resulting in highly intelligent protection.
- **Quarantines spam and suspect emails**, directing unwanted spam to a local quarantine server and allowing end users to manage their quarantined messages, safe lists, and block lists from an easy-to-use, web-based interface.

#### VIRUS, SPYWARE, AND MALWARE PROTECTION

- **Closes the window of vulnerability** between when an attack launches and when scanning filter updates are developed and distributed for zero-hour threat-outbreak protection.
- **Scans inbound email for malicious content** delivered by blended threats for advanced content filtering and malware prevention.
- **Blocks file attachments that are known to be harmful** from entering your network.

#### CENTRALIZED MANAGEMENT AND REPORTING

- **Set It and Forget It Administration** allows you to apply a single policy to control traffic so you spend less time defending your borders and more time focusing on higher business value IT projects.
- **Eliminates email security gaps and reduces administration** efforts by providing a holistic view of what is entering your network.
- **Provides one-click administration for customizable reports** in varying file formats. Meet audit requirements with easily exported or locally saved time-, feature-, and group-based reports.

#### DATA LOSS PREVENTION FOR PRIVACY & COMPLIANCE – available for the XCS 570 model

The WatchGuard XCS 570 model provides even more protection, with the addition of outbound data loss prevention and an optional email encryption subscription.

- **Automatically blocks, quarantines, reroutes**, sends blind copies, encrypts, or allows messages based on user-configurable policies using powerful Transparent Remediation capabilities to prevent data leakage.
- **Pre-Defined Compliance Dictionaries** for GLB, HIPAA, PCI and other regulations are customizable, based on policy requirements for real-time data loss prevention and specific industry regulations.
- **Seamless Email Encryption**, available as an add-on feature for the XCS 570 appliance, secures confidential messages for delivery to any recipient. Does away with the need for a dedicated server, avoiding the costs associated with most encryption technology.
- **Classify types of sensitive data files** using data discovery & classification profiling, thereby training the system on what to look for and the actions to take when such data is discovered in outbound communications.
- **Apply a single policy across multiple protocols** through centralized data loss policy management to protect data-in-motion from loss and policy violations.

## XCS 570 Email Security Suite Adds Outbound Protection

The XCS 570 Enterprise Email Security Suite for mid-sized businesses provides you with inbound and outbound protection from threats to your email networks and protects confidential information from escaping your organizational email boundaries. Includes message-level redundancy to ensure no communication is ever lost and email security is always up and running.

The XCS 570 includes enhanced email security, with:

- Advanced inbound and outbound content filtering
- Compliance dictionaries
- Encryption\*\*
- Document fingerprinting and data classification
- Instant-on data loss prevention
- On-demand clustering
- Queue replication

## Expert Guidance and Support

Every XCS appliance comes with a subscription to LiveSecurity® Service, a comprehensive support and maintenance program that provides:

- Hardware warranty with advance hardware replacement
- Technical support with a 4-hour response time
- Software updates
- Threat alerts

1-year, 2-year, and 3-year subscriptions are available.
