

# Pylon Application Server

## For Lotus Domino®

Instantly extend your Lotus Domino-based custom applications, such as sales force automation, inventory and field service applications, to mobile devices —with no programming. Pylon Application Server lets you sync handheld devices to your Lotus Domino server to greatly improve mobile workforce effectiveness and productivity without requiring significant investments in administrative or development resources. Wireless mobility has never been so powerful, so robust and so simple.

### Boost Employee Productivity with Lotus Domino on Your Mobile Devices

Experience the full power of Domino on a mobile device. Pylon supports mobile access to any Lotus Domino business application, database or content through desktop cradles, wireline and wireless modems. Existing Domino applications can be deployed instantly and new applications can be quickly added using Domino Designer and skills your Domino developers already have.

### Improve the ROI of your Lotus Infrastructure

Pylon Application Server seamlessly extends your existing infrastructure, leveraging the Lotus Domino directory and security model. It provides 128-bit encryption to ensure secure information delivery. Tight integration with the Lotus Domino server enables administrators to support enterprise-wide mobile deployments without any additional training. Individuals are automatically authenticated against the Domino Directory for simple setup and administration with minimal demand on IT resources. IT staff can configure, filter and control access to data sources or can allow users to manage all application data individually, improving the ROI on your existing Lotus Domino solutions.

**iAnywhere™**  
A SYBASE COMPANY

## FACTS AT A GLANCE

### Simple operation and end-user configuration

- Administrators can create custom filters for individuals or groups using Domino formulas
- On-device configuration document offers wireless users the same configuration options as desktop users
- Re-sorts and re-sizes data in custom databases to display the most relevant data
- Full "Find" support in custom databases
- Supports signature capture and scanning input

### Robust Security

- Full support for Lotus Domino and Domino security models using existing ACLs
- Support for Domino 'more secure Internet password'
- Provides 128-bit SSL encryption during data transfer

### KEY BENEFITS

- Increase employee productivity with wireless and offline access to Lotus Notes Domino applications and databases
- Greater return on Lotus Domino investment
- Offers central administration and tight integration with Lotus Domino

### Easy administration and management

- Access databases and applications on multiple Lotus Domino servers including Unix systems
- Domino-integrated interface provides centralized user management
- Create detailed help information for on-device applications through the help menu
- Deploy other Palm PRC applications quickly
- Run an agent at sync time for server-side data checking or manipulation

### Access critical information anywhere, anytime, in any language

- Converts custom Lotus Domino applications into fully functional handheld applications without any re-programming
- Synchronize devices from multiple desktops and wireless services
- Access via offline services, wireless connections and desktop cradles
- Delivers information in any localized Domino language supported by Palm OS or Pocket PC

## SYSTEM REQUIREMENTS

### Device Requirements

#### Palm OS

- Palm OS 3.0-5.2
- Palm Desktop 3.01 or greater Pocket PC Phone Edition 40 KB Palm/60 KB Pocket PC
- Palm OS devices including: Handspring Visor; Edge, Treo; IBM WorkPad; Kyocera Smartphone; Palm M (except M125, M130), VII, V, III, access) (optional) Tungsten T & C; Sony CLIE; 10 KB Palm Symbol Technologies 1500, 1700, 2700

#### Pocket PC

- Pocket PC, Pocket PC 2002 or
- ActiveSync 3.0-3.6
- Pocket PC devices including: HP Jornada, Compaq iPAQ, Casio Cassiopeia

### Application Size

- Psync (for wireless access) (optional)  
40 KB Palm/60 KB Pocket PC
- Pylon Pro  
70 KB Palm/55 Pocket PC
- PylonSelect (for multiple calendar access) (optional)  
10 KB Palm

### Pylon Server Platform Alternatives And Minimum Requirements

- Windows NT, service pack 6
- Windows 2000, service pack 2
- Compatible With Lotus Domino r6, r5, 4.6 and iNotes template
