CONTENTKEEPER® LAUNCHES FILTERING SOLUTION FOR HOME AND MOBILE USERS

ContentKeeper® Technologies has announced the launch of ContentKeeper® Home, a new filtering solution for home and mobile users based on the enterprise-strength technology of their award-winning Internet filtering solution, ContentKeeper® Web.

The solution is a flexible and comprehensive Internet Filter package intended for family and home user PC protection, as well as for use on laptops.

The release of ContentKeeper® Home comes as the company continues with a significant expansion of its solution offering. Their product span now extends from leading Web gateway security solutions for large enterprises and ISPs all the way down to securing Internet access for home PC and laptop users.

David Wigley, Managing Director of ContentKeeper® Technologies, says "We are very excited as we continue to revise our product range to extend our reach into a wider range of markets. ContentKeeper Home provides an excellent filtering choice for home users and families, as it is based on the enterprise-strength technology of ContentKeeper Web, simply scaled down to suit home users. We expect it to be a very competitive offering in this significant market."

About ContentKeeper® Technologies
ContentKeeper® Technologies specialises in scalable, fault-tolerant enterprise-strength Web gateway security solutions to help organizations Monitor, Manage, Control and Secure corporate Internet resources. Using its unique, patented technology Closed Loop Collaborative Filtering™, ContentKeeper's revolutionary Internet content filter is the leading choice for high-end corporate enterprises and organisations with large user bases due to its scalability and ease of use and administration. It offers simplicity and manageability without compromising on performance.

The company continues to concentrate its Research and Development efforts on developing their extensive product range, with the vision of maintaining leadership in the IT Security industry.
